CAMP ACTIVITIES

MORNING

Cardboard Creators	Team up with our cardboard chomper, the super-cool moving helper, and turn cardboard into towers, vehicles, or wild creations! Experiment, tinker, and watch your ideas come to life and move in surprising ways.
Moulding & Casting	Kids will explore the basics of moulding and casting by pouring liquid gypsum into moulds to make their very own cast creations.
Wired Up!	Kids build their own buzzing game using simple electric circuits, then put their steady hands to the test as they try to not set off the buzzer!
Tri-BOT-lon!	Participate in a series of challenges and engaging activities, where kids learn the basics of programming, problem-solving, and teamwork while having a blast navigating their Sphero robot through various challenges.
Colour Shift	Children create their own colour-changing spectacles using rotating filters. They will discover how different lenses can reveal hidden messages, transform pictures, and create surprising visual illusions.

CAMP ACTIVITIES

AFTERNOON

Messy Science	It's all about messy fun, surprising reactions, and discovering how science can be surprising, playful, and full of weird and wonderful reactions.
Quake Proof	The ground is about to shake, and only the strongest tower will survive! Kids build their very own earthquake machine, stack a spaghetti tower on top, and hit the switch. Will it wobble, crash or stand tall?
Spin Art	Wire it. Spin it. Splash it! Young makers bring their own robot to life and turn it into a colour-whirling art studio. Every spin is a surprise and every disc a masterpiece!
Robo Maze	Can your robot find its way out? Kids design and build their own maze from scratch, packed with twists, turns and tricky ends, then guide their robot through it to the finish!
Rovers and Research	Kids experiment with sunlight to see how solar energy can power simple devices or circuits.
